Вставь числа 3,4,5,6 вместо точек. Главное условие – в каждом примере используй три разных числа из заданных чисел.

1) … x … – … = 6
2) … x … – … = 11
3) … x … – … = 19
4) … x … + … = 26
5) … x … – … = 13
6) … x … + … = 17
7) … x … – … = 26
8) … x … + … = 29

УДК 373:51
ББК 22.1я71
У34

ISBN 978-5-271-14526-1

Пособие содержит 3000 математических примеров по теме «Табличное умножение и деление». Оригинальное построение материала позволяет обеспечить более глубокое его усвоение.

Как показывает практика, ученик полностью освоил программу, если решает и записывает ответ по истечении 4–7 секунд. В этом случае можно говорить, что навык счёта доведен до автоматизма.

На каждой странице приведены 5–7 столбиков в среднем по 52 примера. В конце столбика записывается время. В нижнем левом углу обозначены контрольные цифры: идеальное время решения одного столбика, удовлетворительное и результат, который должен заставить ученика задуматься. Чтобы достичь отличных результатов, каждый день следует решать по одной странице.

Для учеников, раньше остальных выполнивших задание, а также для максимально эффективного усвоения темы в конце каждой страницы даны усложненные задания – «бонусы».

Пособие может быть использовано на уроках математики, а также для работы дома.
