Пособие содержит 3000 примеров по математике. Тема «Сотня» – одна из базовых тем, изучаемых во втором классе. Как и любая другая, она требует внимательного осмысления и хорошего закрепления.

Как показывает практика, ученик полностью освоил тему, если решает пример и записывает ответ в течение 4–7 секунд. В этом случае можно говорить, что навык счета доведен до автоматизма.

На каждой странице приведены 7 столбиков по 50 примеров каждый. В конце столбика записывается время, потраченное учеником на решение. В левом нижнем углу обозначены контрольные цифры: идеальное время решения одного столбика, удовлетворительное и результат, который должен заставить ученика задуматься.

Учителю сложно проверить такое большое количество примеров, поэтому лучше, если время, затраченное на решение каждого столбика, отметят взрослые дома.

Чтобы достичь хороших результатов, каждый день нужно решать по одной странице.

Пособие можно использовать в качестве дополнительного материала на уроках математики, а также для работы дома.
